Economically Distressed Areas Program - Background

For over 30 years, the Texas Water Development Board (TWDB), state officials, and the citizens of Texas have been working together to provide affordable funding for essential basic water and wastewater infrastructure throughout the state. With the development of the Economically Distressed Areas Program (EDAP), in conjunction with other TWDB programs, approximately over \$1.095 billion in grants and loans have been made available to fund the planning, acquisition, design, and construction of such projects.

EDAP provides statewide financial assistance, in the form of grants and loans, to cities, counties, water districts and nonprofit water supply corporations in economic distress. EDAP projects provide drinking water and wastewater treatment to Texas residents previously without service and improve existing utility systems that do not meet minimum state standards.

In 1989, the 71st Legislature passed comprehensive legislation that established the EDAP and the Model Subdivision Rules (MSR) for the regulation of future residential subdivisions. These laws focused on two major goals: delivering water and wastewater services to meet the immediate health and safety concerns and stopping the proliferation of sub-standard subdivisions through the enforcement of development standards.

Throughout its history, the EDAP has involved collaborative funding with state and federal agencies, such as the Environmental Protection Agency, the United States Department of Agriculture-Rural Development, the Texas Department of Agriculture, North American Development Bank, the Border Environmental Cooperation Commission, and local governments including counties, cities, water and wastewater utilities, and nonprofit groups.

In Fall 2018, the TWDB exhausted its remaining EDAP funding capacity by prioritizing the completion of projects that had already received EDAP funds for preliminary phases. In 2019, the 86th Texas Legislature passed Senate Bill 2452 and Texas voters approved Proposition 2, providing the TWDB with bonding authorization not to exceed \$200 million and a mandate to implement prioritization for EDAP projects in the future.

In 2021, the 87th Texas Legislature appropriated a total of approximately \$6 million in funding for EDAP debt service. This will allow the agency to issue up to \$50 million in General Obligation bond proceeds each fiscal year (\$100 million over the biennium).

The TWDB is currently developing revised program rules related to prioritization and will begin accepting new EDAP applications when completed. Senate Bill 2452 included prioritization criteria designed to give highest consideration for projects that will have a substantial effect, including those serving areas determined to have a nuisance dangerous to public health and safety resulting from water supply and sanitation problems, or for applicants subject to an enforcement action related to water supply or sewer service violations.

EDAP Report Updates

Since the previous report:

- Three projects were completed in State Fiscal Year 2021.
- One project previously awarded funding under the EDAP received funding through the Clean Water State Revolving Fund for construction activities.
- New EDAP activity is expected in SFY 2022 as a result of legislative appropriations.

Summary of Active and Completed EDAP Projects

County	Active				Completed				Combined Totals			Estimated future costs*

1. The above figures reflect actual funds expended and current, active commitments. EDAP Funding amounts include EDAP related programs: Colonia Wastewater Treatment Assistance Program, Colonia Self Help, Community Self Help, and Research and Planning.
2. "Population Served" refers to residents served by completed EDAP projects, or an estimate of residents served once ongoing projects reach completion.
3. "Estimated Future Costs" refers to funds necessary to complete ongoing EDAP projects- either to begin construction or to move projects in the planning phases into the construction phase and through completion, as determined and requested by the relevant authorities.

Active and Completed Projects from SFY 2021

- Notes:
- "EDAP Population" refers to residents who qualify as Economically Distressed within a relevant subdivision.
 - MSR stands for "Model Subdivision Rules." In order to be eligible for EDAP funding, the relevant authority must adopt and enforce MSR standards in order to limit the proliferation of substandard living units within the subdivision.
 - Planned completion dates may only be available for projects that have been funded for construction phase activities by the TWDB. Projects with past completion dates that are still labeled "Active" have completed construction activities but are still awaiting finalization.

State Fiscal Year 2021 Active and Completed Projects

Note: All counties listed as containing EDAP funded projects have also adopted Model Subdivision Rules (MSRs).
